Profile

Full-stack developer with experience at a software house on a Java/Jakarta EE ERP system and its related web applications: UI migration, platform bug fixing, performance work, and automated testing.

I also build with AI agents (Claude Code). Starting October 2026 I'm studying Computer Science and Software Production Technologies at the University of Bari "Aldo Moro".

Experience

July 2025 – **present**

Full-Stack Java Developer

Codeka · software house, Barletta, Italy

School-to-work internship, part-time in the afternoons during the school year and full-time during school breaks. I work in a team, with development assisted by AI agents (Claude Code).

JERP, ERP system `Java · Jakarta EE · JSF/PrimeFaces · PostgreSQL · WildFly`

- Migrated the UI from ICEfaces/JSPX to Jakarta EE with JSF and PrimeFaces, across several modules (accounting, purchasing, sales, logistics, warehouse).
- Identified and fixed several platform defects, worked on performance, and wrote automated and integration tests.

B2B Agents Portal `Java · JSF · Tailwind CSS`

- Portal for sales agents connected to the ERP: catalog, cart, orders, and print-outs.
- Per-client customizations: payment terms, stock availability, and discontinued catalog items.

Fast Order `Java · Tailwind CSS`

- Item and commission pages: filters by product category and discontinued items, bulk management per agent.
- Refactored duplicated code and fixed a SQL injection vulnerability.

Personal Projects

September 2026 – ongoing

Sciamn, class timetable for UniBA and Poliba

Free, unofficial Android app for University of Bari and Polytechnic of Bari students, with a website and timetable pages updated daily · lordmarte-a669.github.io/sciamn

- **Stack:** `JavaScript · Capacitor 8 · Java (plugin Android) · Cloudflare Workers + D1 · GitHub Actions`

March – August 2026

PET, Personal Expense Tracker

Installable web app (PWA) to track income and expenses · private project, not yet open source

- **Stack:** `Next.js 16 · React 19 · TypeScript · Tailwind CSS · PostgreSQL (Supabase) · Drizzle ORM · pgvector · NextAuth · Zod · Vitest · Docker`
- **AI chat assistant:** Claude with tool use to manage transactions in natural language, with embedding-based semantic search.
- **AI costs:** prompt caching and a classifier that skips the model for simpler requests.
- **Transaction import:** parsers for PayPal, Revolut, and UniCredit (CSV and PDF) with AI-based classification and deduplication.
- **Features:** dashboard, charts, automatic recurring transactions, push notifications, voice input, users with roles and separate data.
- **Quality:** automated test suite, input validation, SonarQube findings fixed, optimized mobile version.
- **In progress:** bank account integration via Open Banking.

Technical Skills

Programming Languages	`Java, TypeScript, JavaScript, SQL, Python, HTML, CSS`
Backend	`Jakarta EE (JSF, CDI), WildFly, Maven, Django REST Framework, Node.js`
Frontend	`PrimeFaces, React, Next.js, Angular, Tailwind CSS`
Testing & Quality	`JUnit, Playwright, Vitest, Zod, SonarQube`
DevOps & Tools	`Git, GitHub Actions (CI), Docker, Vercel, Linux, IntelliJ IDEA`
AI	`Agent-based development (Claude Code: rules, skills, hooks)`

Languages

Italian	`Native speaker`
English	`Cambridge English B2 First (FCE), Grade B – score 176/190`

Education

2026

IT Technical High School Diploma

ITIS "E. Fermi", Barletta, Italy · grade 95/100

From October 2026

Bachelor's Degree in Computer Science and Software Production Technologies (ITPS)

University of Bari "Aldo Moro"
